

(Part 4 - 15 pieces of furniture)

Proyecto 47: Estantería alta multifuncional con escritorio incorporado

Project 47: Multifunctional Tall Bookcase with Built-in Desk

1. Description of the furniture

Mixed-use furniture that combines tall storage shelves with a functional desk in the center. Perfect for small spaces like studios, home offices, or teen rooms. Its metal structure provides stability, while the shelves allow for efficient vertical organization.

2. General measures

- **Total height:** 220 cm
- **Total width:** 80 cm

- **Depth:** 50 cm (base), 25–30 cm (top)
- **Desk height:** 80.6 cm
- **Height between upper shelves:** 55 cm and 42 cm
- **Height between lower shelves:** 45 cm and 30.5 cm

3. Bill of materials (metal structure)

Component	Metal profile	Approximate measurements	Amount
Vertical legs	Metalon 25x25 mm	220 cm	4 pieces
Sleepers horizontal	Metal 25x25 mm	80 cm, 50 cm, 30 cm, 25 cm	10+ pieces
Internal reinforcements	Metalon 20x20 mm	Variables	According to design

Additional material:

- 5 wooden shelves:
 - 2 lower ones of 80 x 50 cm
 - 1 desk 80 x 50 cm
 - 2 upper ones of 80 x 30 cm and 80 x 25 cm
- Invisible screws or fixings
- Anti-corrosive black paint or varnish

4. Necessary tools

- MIG or inverter welder
- Angle grinder
- Drill with metal and wood bits

- Sander or sandpaper
- Tape measure, set square and level
- Paint (spray or brush)

5. Cutting details (structure)

Part	Measurement (cm)
Main legs	220
Horizontal stringers	80, 50, 30, 25 depending on the level
Wooden shelves	See above

6. Difficulty level

High – Requires precision in vertical assembly and fixing of multiple levels.

7. Estimated manufacturing time

8 to 12 hours (frame, painting, shelf assembly)

8. Assembly instructions

1. **Cut and weld the base structure**, ensuring level and square.
2. **Add horizontal crossbars** according to the design (desk height, shelves).
3. **Add side or rear reinforcements** to prevent oscillations.
4. **Sand, paint and prepare metal surface.**
5. **Assemble the wooden shelves** by securing them from below with screws.

9. Additional tips

- You can add **side hooks or hanging document holders** on the sides.
- Ideal for small spaces thanks to its vertical and functional design.
- Perfect for **work areas, kitchen or even as a sewing station or tools.**

Proyecto 48: Estantería funcional de 5 niveles con diseño mixto

Project 48 : **Functional 5-Tier Shelving Unit with Mixed Design**

1. Description of the furniture

Versatile shelving ideal for kitchens, studios, retail spaces, or pantries. It combines wide lower shelves for large items with narrower upper shelves for decorative items, jars, or light storage.

2. General measures

- **Total height:** 170 cm

- **Width:** 80 cm
- **Depth:** 40 cm
- **Height between shelves (from bottom to top):**
 - 35 cm
 - 35 cm
 - 55 cm
 - 20 cm
 - 15 cm

3. Bill of materials (metal structure)

Component	Metal profile	Amount
		Approximate measurements
Vertical legs	Metalon 25x25 mm 170 cm	4 pieces
Horizontal stringers	Metalon 25x25 mm 80 cm and 40 cm	10 pieces approx.
Side reinforcements	Metalon 20x20 mm Variables according to shelf	According to design

Additional material:

- 5 wooden shelves:
 - 3 large shelves: 80 x 40 cm
 - 2 upper shelves: 80 x 20 cm and 80 x 15 cm
- Concealed screws and brackets
- Anti-corrosive black paint or varnish

4. Necessary tools

- MIG or inverter welder
- Angle grinder
- Drill with metal and wood bits
- Sander or sandpaper
- Tape measure, set square and level
- Paint (spray or brush)

5. Cutting details (structure)

Part	Measures
Paws	170 cm
Width of shelves	80 cm
Depths	40 cm, 20 cm, 15 cm

6. Difficulty level

Medium – Structurally simple project, ideal for storage spaces.

7. Estimated manufacturing time

6 to 8 hours (structure, painting and assembly)

8. Assembly instructions

1. **Cut and assemble the base structure** with vertical and horizontal profiles.
2. **Distribute the stringers** according to the desired heights: 35 cm, 55 cm, etc.
3. **Weld or attach additional supports for thin upper shelves.**

4. **Sand, clean and paint the structure.**

5. **Mount the shelves** with screws from below or with invisible fixings.

9. Additional tips

- Ideal for use in **kitchen, office or plant shelf.**
- You can add **wheels with brakes** to convert it into a mobile unit.
- The combination of sizes offers maximum functionality in small spaces.

Proyecto 49: Estación de cocina multifuncional con canastas y repisas

Project 49: Multifunctional kitchen station with baskets and shelves

1. Description of the furniture

This compact and versatile kitchen station offers efficient vertical storage. It features shelves, sliding metal baskets, a top hanging utensil rack, and a sturdy metal frame. Ideal for small kitchens, apartments, or even as a utility station for coffee makers, microwaves, or pantry items.

2. General measures

- **Total height:** 62.99" ÷ 160 cm
- **Total width:** 31.49" ÷ 80 cm
- **Depth:** 14.96" ÷ 38 cm
- **Lower module height:** 33.46" ÷ 85 cm
- **Height of the top support from the table:**
 - Total: 29.5" ÷ 75 cm
 - From table: 21.45" and 35.59" (useful height between bars)

Metal baskets

- Dimensions: 13.58" x 10.43" x 4.72" (÷ 34.5 x 26.5 x 12 cm)

3. Bill of materials (metal structure)

Component	Metal profile	Amount	
		Approximate measurements	
Main structure	Metalon 20x20 mm 160 cm total	4 legs + crossbars	
Baskets metallic	Welded rod or mesh	34.5 x 26.5 x 12 cm	2 pieces
Top bars Round tube 3/4"		80 cm and 75 cm approx. 2 pieces	

Additional material:

- 3 wooden shelves: 80 x 38 cm
- Screws, hinges or guides for sliding baskets
- Hanging hooks (for kitchen utensils)
- Black anti-corrosion paint

4. Necessary tools

- MIG or inverter welder
- Angle grinder
- Drill with bits for metal and wood
- Sander or sandpaper
- Tape measure and set square
- Paint (spray or brush)

5. Cutting details (structure)

Part	Estimated measurement (cm)
Vertical legs	160
Horizontal stringers	80 and 38
Shelves	80 x 38
Baskets	34.5 x 26.5 x 12

6. Difficulty level

Medium-High – Requires precision when integrating baskets and multiple functional levels.

7. Estimated manufacturing time

7 to 10 hours (structure, painting, assembly, basket adjustment)

8. Assembly instructions

1. **Weld the base structure**, ensuring the heights of the 3 shelves.

2. **Integrate upper horizontal bars** to hang utensils.
 3. **Secure metal baskets** with guides or hinges in the lower area.
 4. **Sand and paint the entire structure.**
 5. **Assemble the wooden shelves** and add hooks to the top.
-

9. Additional tips

- You can add **wheels with brakes** to make it mobile.
- Ideal as **a mini kitchen island, coffee maker cabinet, or snack station.**
- Includes **LED lighting or motion sensors** for dark areas.

Proyecto 50: Estación auxiliar de cocina o recibidor con ganchos y repisas

Project 50: Kitchen or Hallway Utility Station with Hooks and Shelves

1. Description of the furniture

Functional metal frame furniture with 3 levels of shelves, lower grill and hooks Hanging. Ideal as an auxiliary station in the kitchen to hang utensils, place small appliances, or as a hall furniture to hang keys, bags and leave personal belongings.

2. General measures

- **Total height:** 66.9" ÷ 170 cm
- **Total width:** 33.7" ÷ 85.6 cm
- **Depth:** 15.7" ÷ 40 cm
- **Height between shelves:** 14" ÷ 35.5 cm (each lower level)
- **Height of space between top shelf and hooks:** 7.9" ÷ 20 cm
- **Top shelf depth:** 4.7" ÷ 12 cm

3. Bill of materials (metal structure)

Component	Metal profile	Measures approximate	Amount
Vertical legs	Metalon 25x25 mm	170 cm	4 pieces
Crossbars horizontal	Metalon 25x25 mm	85.6 cm and 40 cm	8+ pieces
Lower grill	Wire mesh	85 x 40 cm	1 piece
Medium decorative grid 3/8" rod or mesh 40 x 30 cm			1 piece

Additional material:

- 3 wooden shelves: 85.6 x 40 cm
- 1 top shelf: 85.6 x 12 cm
- Metal hooks (x6)
- Invisible screws and fixings

- Matte black or anticorrosive paint
-

4. Necessary tools

- MIG or inverter welder
 - Angle grinder
 - Drill with metal and wood bits
 - Sander or sandpaper
 - Tape measure, set square and level
 - Paint (spray or brush)
-

5. Cutting details (structure)

Part	Measurements (cm)
Total height	170
Broad	85.6
Background	40
Height between shelves	35.5
Top shelf	85.6 x 12

6. Difficulty level

Medium – Practical project with multiple functions, but simple assembly.

7. Estimated manufacturing time

6 to 8 hours (structure, painting, installation)

8. Assembly instructions

1. **Cut and weld the vertical frames** with well-defined shelf spaces.
2. **Add top crossbars and side supports to secure the grille and the hanging shelf.**
3. **Fix the bottom mesh** and wooden supports on the levels.
4. **Sand and paint the entire metal structure.**
5. **Screw the shelves together and place the hooks on the top shelf.**

9. Additional tips

- You can **customize the number and type of hooks** for keys, cups, or utensils.
- Ideal for a kitchen corner or entryway with an industrial style.
- You can place **adhesive LED lights** under the top shelf for extra functionality.

Proyecto 51: Librero alto de 5 niveles con refuerzo cruzado

Project 51: 5-Tier Tall Bookcase with Cross Bracing

1. Description of the furniture

Vertical bookcase or shelving unit with a metal frame and five levels of wooden shelves. It features a cross-bracing system at the back for increased stability. Ideal for books, plants, decorative objects, or office supplies.

2. General measures

- **Total height:** 150 cm
- **Width:** 60 cm
- **Depth:** 30 cm
- **Useful height between shelves (from below):**

- 29 cm
- 31 cm
- 31 cm
- 31 cm
- 13 cm (last space to the top frame)

3. Bill of materials (metal structure)

Component	Metal profile	Measures approximate	Quantity
Vertical legs	Metalon 20x20 mm	150 cm	4 pieces
Horizontal sleepers	Metalon 20x20 mm	60 cm and 30 cm	10 parts
Cross reinforcements (rear)	Smooth rod 3/8" or flat iron	± 70 cm each in diagonal	2 pieces

Additional material:

- 5 wooden shelves: 60 x 30 cm
- Self-tapping screws
- Anti-corrosive black paint or wood varnish

4. Necessary tools

- MIG or inverter welder
- Angle grinder
- Drill with bits for metal and wood
- Sander or sandpaper
- Tape measure and set square

- Paint (spray or brush)
-

5. Cutting details (structure)

Part	Measurement (cm)
Total height	150
Shelf width	60
Depth	30
Height between levels	29 and 31
Rear diagonals	~70 (each in a cross)

6. Difficulty level

Low – Ideal for beginners who want to create a functional and decorative piece of furniture.

7. Estimated manufacturing time

4 to 6 hours (structure, painting and assembly)

8. Assembly instructions

1. **Cut and assemble the side and front structure** with vertical profiles and horizontal.
 2. **Weld the cross braces** on the rear.
 3. **Sand and paint the metal structure.**
 4. **Screw the wooden shelves** to each level from below or with hidden brackets.
-

9. Additional tips

- You can add **stops or levelers to the legs** if the floor is not even.
- Use **stained or varnished shelves** for a rustic or industrial finish.
- It can also serve as **a shelf for the bathroom, office or kitchen**.

Proyecto 52: Estantería de esquina en forma de L con 5 niveles

Project 52 : 5-Tier L-Shaped Corner Bookcase

1. Description of the furniture

Metal shelving unit with an L-shaped corner design, ideal for maximizing the use of space in living rooms, studios, or bedrooms. With five spacious levels, it offers plenty of storage capacity without sacrificing style. The wooden shelves add warmth to the industrial design.

2. General measures

- **Total height:** 180.5 cm

- **Long side:** 110 cm
- **Short side:** 90 cm
- **Shelf depth:** 30 cm
- **Height between shelves:** 41.5 cm
- **Interior angle measurement:**
 - Left arm: 31.5 cm
 - Right arm: 23.6 cm

3. Bill of materials (metal structure)

Component	Metal profile	Approximate measurements	Amount
Vertical legs (6)	Metal 25x25 mm	180.5 cm	6 pieces
Horizontal crossbars	Metalon 25x25 mm	90 cm, 110 cm, and 30 cm connectors	multiple
Reinforcements of corner	Metalon 20x20 mm	23.6 cm – 31.5 cm	According to internal union

Additional material:

- 5 large L-shaped shelves (90° joint type): stained wood or melamine
 - Self-tapping screws
 - Interior supports or joining angles
 - Black anti-corrosion paint
-

4. Necessary tools

- MIG or inverter welder
- Angle grinder

- Drill with metal and wood bits
- Sander or sandpaper
- Tape measure and set square
- Paint (spray or brush)

5. Cutting details (structure)

Part	Measurement (cm)
Total height	180.5
Arm width	110 and 90
Shelf depth	30
Reinforcement of interior union 23.6 and 31.5	

6. Difficulty level

High – The L-shape requires precision squaring and leveling to avoid misalignment.

7. Estimated manufacturing time

10 to 14 hours (frame, painting, corner joints, shelves)

8. Assembly instructions

1. **Cut and assemble the two side structures** (long and short).
2. **Add interior angle connectors** and reinforce the “L” type joint.
3. **Weld horizontal crossbars** on each level to support shelves.
4. **Sand, paint and let the structure dry.**
5. **Attach L-shaped shelves** to each tier with screws from below.

9. Additional tips

- Use cardboard templates to cut the “L” shelves accurately.
- Ideal as a **corner piece in a living room, a bookcase, or a plant stand.**
- You can close the back with **decorative metal mesh** to prevent falls.

Proyecto 53: Mueble recibidor tipo perchero con zapatera y banco

Project 53: Hallway furniture with a coat rack and a bench

1. Description of the furniture

Multifunctional furniture perfect for entryways or hallways. It includes an upper coat rack with double hooks, a seating bench, and two levels of metal shoe rack below. It provides organization, functionality, and industrial style in small spaces.

2. General measures

- **Overall height:** 71.5" ÷ 181.6 cm
- **Total width:** 33" ÷ 84 cm
- **Depth:** 12" ÷ 30.5 cm
- **Bench Height:** 21.3" ÷ 54 cm
- **Useful height under the bench:**
 - First level shoe rack: 8.4" ÷ 21.3 cm
 - Second level shoe rack: 8.4" ÷ 21.3 cm
- **Space from bench to coat rack:** 36" ÷ 91.5 cm
- **Upper decorative ceiling:** 5.9" ÷ 15 cm

3. Bill of materials (metal structure)

Component	Metal profile	Measures approximate	Amount
Vertical legs	Metalon 20x20 mm	181.6 cm	4 pieces
Stringers horizontal	Metalon 20x20 mm	84 cm, 30 cm	multiple
Shoe rack Metal rod or mesh		2 pieces of 84 x 30 cm	2 units
Metal hooks Stainless steel or iron wrought		x10	

Additional material:

- Wooden boards for seat and coat rack (rustic finish):
 - Bench: 84 x 30 cm
 - Top panel with hooks: 84 x 12 cm
- Screws, plugs and concealed fixings
- Matte black or anticorrosive paint

4. Necessary tools

- MIG or inverter welder
- Angle grinder
- Drill with bits for metal and wood
- Sander or sandpaper
- Tape measure and set square
- Paint (spray or brush)

5. Cutting details (structure)

Part	Measurement (cm)
Total height	181.6
Bench width	84
Depth	30.5
Seat height	54
Height between shoemakers	21.3
Top panel	84 x 12

6. Difficulty level

Medium – Requires precision in vertical mounting and level alignment.

7. Estimated manufacturing time

6 to 9 hours (structure, painting, and assembly of parts)

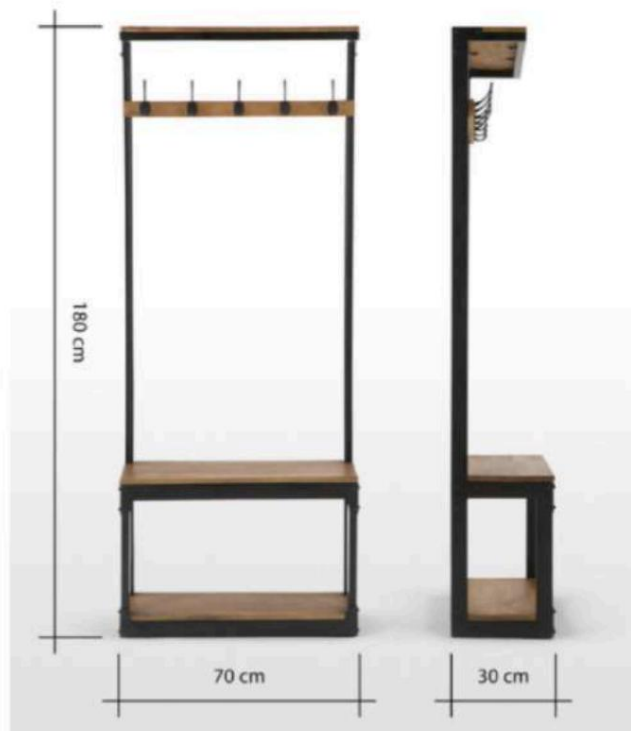

8. Assembly instructions

1. **Cut profiles for legs and base.** Weld them together to form the main frame.
 2. **Add the horizontal** bench supports and shoe rack levels.
 3. **Secure the lower metal grids** and upper panels with hooks.
 4. **Sand, paint and assemble the wooden surfaces.**
-

9. Additional tips

- You can add a **hidden drawer or compartment under the seat.**
- If you prefer mobility, install **wheels with brakes on the legs.**
- You can also use it in **youth bedrooms or small dressing rooms.**

Proyecto 54: Perchero minimalista con banco y repisa inferior

Project 54: Minimalist coat rack with bench and lower shelf

1. Description of the furniture

Minimalist industrial design for hallways or bedrooms. The coat rack combines a metal frame with a functional bench for putting on shoes, as well as a lower shelf for shoes or light storage. Ideal for small spaces or Nordic-industrial styles.

2. General measures

- **Total height:** 180 cm
 - **Total width:** 70 cm
 - **Depth:** 30 cm
 - **Bench height:** approx. 45 cm
 - **Height between bench and lower shelf:** approx. 35 cm
 - **Number of hooks:** 5 metal (installed on a wooden board)
-

3. Bill of materials (metal structure)

Component	Metal profile	Measures approximate	Amount
Vertical legs	Metalon 25x25 mm	180 cm	2 pieces
Bottom brackets	Metalon 25x25 mm	70 cm and 30 cm	several
Base reinforcements	Metalon 20x20 mm	70 cm and 30 cm	several

Additional material:

- 2 wooden planks:
 - Bench: 70 x 30 cm

- Bottom shelf: 70 x 30 cm
 - 1 hook board: approx. 70 x 10 cm.
 - 5 black metal hooks
 - Screws and fixings
 - Black paint and varnish
-

4. Necessary tools

- MIG or inverter welder
 - Angle grinder
 - Drill with bits for metal and wood
 - Sander or sandpaper
 - Tape measure and set square
 - Matte black or anticorrosive paint
-

5. Cutting details (structure)

Part	Measurement (cm)
Total height	180
Broad	70
Depth	30
Hook table	70 x 10

6. Difficulty level

Low – Ideal project for beginners who want a useful and decorative piece of furniture.

ÿ 7. Estimated manufacturing time

ÿÿ 4 to 6 hours (structure, painting and assembly)

8. Assembly instructions

1. **Cut and weld the side and base profiles** precisely.
 2. **Add lower shelf support**, with useful space between levels.
 3. **Mount a wooden board with metal hooks** on top.
 4. **Sand and paint the entire structure.**
 5. **Screw the bench and the lower shelf.**
-

9. Additional tips

- Ideal for **small apartments, entryways, or youth bedrooms.**
- You can replace the hooks with a bar to hang hangers.
- Pair it with a **decorative tray or lower basket** for added functionality.

Proyecto 55: Soporte escalonado para macetas o decoración

Project 55: Stepped stand for flower pots or decor

1. Description of the furniture

Minimalist and industrial design stand, with three height levels in a stepped format.

Ideal for displaying flower pots, decorative sculptures, or even as an additional shelf in living rooms, terraces, or entryways. Its compact design allows it to fit into corners or tight spaces.

2. General measures

- **Total height:** 80 cm (highest level)
- **Base dimensions:** 40 x 40 cm
- **Measurement of each level:**
 - Upper surface of each module: 20 x 20 cm

- Approximate heights:

• Level 1: 30 cm

• Level 2: 55 cm

• Level 3: 80 cm

3. Bill of materials (metal structure)

Component	Metal profile	Measures approximate	Amount
Vertical tubes	Metalon 20x20 mm	30 cm, 55 cm, 80 cm	6 pieces
Frames of each base	Metalon 20x20 mm	20 x 20 cm (square)	3 pieces
Metalon bottom reinforcements	20x20 mm	40 cm (total base)	4 pieces
L-shaped joint (floor)	Metalon 20x20 mm	40 x 40 cm	1 frame square

Additional material:

- 3 square wooden slats (or sheets): 20 x 20 cm
- Screws or direct welding
- Black anti-corrosion paint
- Levelers or rubber bases (optional)

4. Necessary tools

- MIG or inverter welder
- Angle grinder
- Drill and metal bits
- Sander or sandpaper

- Tape measure, set square and level
 - Paint (spray or brush)
-

5. Cutting details (structure)

Part	Measurement (cm)
Base of the furniture	40 x 40
Platforms	20 x 20
Support heights	30 / 55 / 80

6. Difficulty level

Low – Ideal for beginners or quick functional decorating projects.

7. Estimated manufacturing time

3 to 5 hours (structure, painting, assembly)

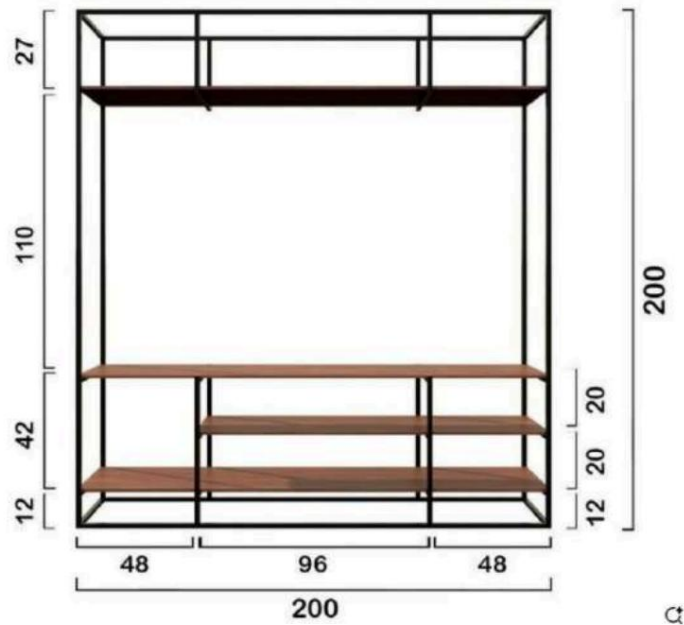

8. Assembly instructions

1. Cut and weld the 40 x 40 cm square base as a mother structure.
 2. Assemble the three staggered vertical modules with their upper platforms.
 3. Check level and perpendicularity between modules.
 4. Sand and paint the structure.
 5. Fix the wooden slats or sheet metal on the upper frames.
-

9. Additional tips

- You can modify the colors according to the style: **matte black, white or gold.**
- Use it as **an indoor plant stand** or for store display.
- Add **casters or levelers** if you want additional mobility or stability.

Proyecto 56: Mueble organizador de ropa con barra, repisas y zapatera

Project 56: Clothes organizer with rod, shelves, and shoe rack

1. Description of the furniture

An open closet-style clothing organizer with a modern, industrial design. It includes a hanging rod, a top shelf, a middle shelf for suitcases or boxes, and three lower levels in a shoe rack format. Ideal for bedrooms, dressing rooms, or stores.

2. General measures

- **Total height:** 200 cm
- **Total width:** 200 cm
- **Depth:** 48 cm

- **Hanging bar height:** 110 cm from the floor
 - **Top shelf height:** 27 cm
 - **Middle shelf height:** 42 cm from the base
 - **Lower shoe rack:**
 - First level from ground: 12 cm
 - Spaces between levels: 20 cm each
 - **Side sections:** 48 cm each
 - **Center section:** 96 cm
-

3. Bill of materials (metal structure)

Component	Metal profile	Amount	
		Approximate measurements	
Vertical structure	Metalon 25x25 mm	200 cm	4 pieces
Horizontal supports	Metalon 25x25 mm	48cm,96cm,200cm multiple	
Clothes hanging bar	Solid round 3/4" or tube 1"	200 cm	1 piece

Additional material:

- 6 wooden shelves:
 - Top: 200 x 48 cm
 - Middle shelf: 200 x 48 cm
 - Shoe rack: 96 x 48 cm (x3)
- Concealed screws or fixings
- Matte black or anticorrosive paint
- Hooks or hangers

4. Necessary tools

- MIG or inverter welder
 - Angle grinder
 - Drill with metal and wood bits
 - Sander or sandpaper
 - Tape measure and set square
 - Matte black or powder coating
-

5. Cutting details (structure)

Part	Measurement (cm)
Total height	200
Overall width	200
Depth	48
Internal divisions 48 / 96 / 48	
Lower levels 20 cm between each one	

6. Difficulty level

Medium-High – Due to its size and number of elements, it requires precision in alignment.

7. Estimated manufacturing time

8 to 12 hours (structure, painting and complete assembly)

8. Assembly instructions

1. Weld the main structure with the vertical and horizontal cross members.
 2. Install a metal bar to hang clothes.
 3. Assemble the upper, intermediate and shoe rack shelves.
 4. Ensure level and square in each section.
 5. Sand, paint and place all wood surfaces.
-

9. Additional tips

- You can add **industrial wheels** if you want mobility.
- Ideal for combining with **organizing boxes or woven baskets**.
- It can be adapted for stores as **a clothing display**.

Proyecto 57: Mesa lateral o auxiliar con estantes y base metálica rejada

Project 57: Side or auxiliary table with shelves and a metal lattice base

1. Description of the furniture

Compact industrial style table with metal frame, wooden top surface, Intermediate shelf and lower metal grid base. Perfect as a nightstand, table room assistant, printer stand or charging station.

2. General measurements (in inches and centimeters)

- **Total height:** 23.3" ÿ 59 cm
- **Front width:** 23.3" ÿ 59 cm
- **Depth:** 14.2" ÿ 36 cm
- **Upper surface length:** 18.1" ÿ 46 cm
- **Height between surfaces:**
 - Between metal base and shelf: 11.1" ÿ 28 cm
 - Between shelf and cover: 6.5" ÿ 16.5 cm

3. Bill of materials (metal structure)

Component	Metal profile	Measures approximate	Quantity d
Vertical legs	Metalon 20x20 mm	59 cm	4 pieces
Supports superiors	Metalon 20x20 mm	46 cm / 36 cm	4 pieces
Metalon diagonal reinforcement 20x20 mm		2 inclined pieces	2 pieces
Lower base grate	Expanded sheet or mesh metallic	59 x 36 cm	1 piece

Additional material:

- 2 MDF or pine wood slats:
 - Top: 46 x 36 cm
 - Intermediate shelf: 46 x 36 cm

- Self-tapping or fixing screws
 - Matte black paint for structure
 - Leg levelers (optional)
-

4. Necessary tools

- Drill
 - Angle grinder
 - Welder (or screws and brackets)
 - Sander
 - Tape measure and set square
 - Paint brushes or spray
-

5. Cutting details (structure)

Part	Approximate measurement
Total height	59 cm
Surface length	46 cm
Background	36 cm
Intermediate shelf 46 x 36 cm	
Metal grated base	59 x 36 cm

6. Difficulty level

Low – Ideal for beginners in blacksmithing or functional DIY.

7. Estimated manufacturing time

ÿÿ 2 to 4 hours (structure, painting and assembly)

8. Assembly instructions

- 1. Cut and assemble the upper rectangular structure and legs.**
 - 2. Install diagonal braces for rigidity.**
 - 3. Place the middle shelf at the desired height.**
 - 4. Weld or screw the metal bottom grille.**
 - 5. Sand, paint and fix the wooden surfaces.**
-

9. Additional tips

- A **desk lamp or USB plug** can be added for extra functions.
- Ideal for use in small spaces, **next to sofas, beds or desks.**
- It can also be used as **a table for coffee makers or plants.**

Proyecto 58: Mesa lateral con doble repisa en Z

Project 58: Side table with double Z-shaped shelf

1. Description of the furniture

Industrial-style side table with an inverted Z-shaped structure, incorporating two wooden shelves. Perfect for use as a side table next to armchairs, beds, or even as a decorative stand. The suspended design allows it to be placed over sofas or beds thanks to its open base.

2. General measures

- Total height: 60 cm

- **Total width (depth):** 30 cm
 - **Total length (front):** 45 cm
 - **Height between shelves:** 26 cm
 - **Height from base to first shelf:** 25 cm
 - **Shelf thickness:** 3.5 cm
-

3. Bill of materials (metal structure)

Component	Metal profile	Measures approximate	Amount
Vertical structure	Metalon 20x20 mm 25 cm + 26 cm + 9 cm 4 sections		
Horizontal supports	Metalon 20x20 mm 45 cm (front)		2 pieces
Lower rectangular base	Metalon 20x20 mm 45 x 30 cm (closed)		1 full frame

Additional material:

- 2 wooden shelves measuring 45 x 30 x 3.5 cm
 - Concealed internal screws or fixings
 - Black paint for the metal structure
 - Varnish or sealer for the shelves
-

4. Necessary tools

- Welder or screws with metal brackets
- Angle grinder or grinder
- Drill with bits for metal and wood
- Hand sander or sandpaper

- Tape measure and level
- Brush or spray paint

5. Cutting details (structure)

Part	Extent
Total height	60 cm
Forehead	45 cm
Background	30 cm
Shelf height 25 cm and 26 cm	
Thickness of shelves	3.5 cm

6. Difficulty level

Low – Ideal as a first project to practice Z-shaped structures.

7. Estimated manufacturing time

2 to 4 hours (structure, painting and assembly)

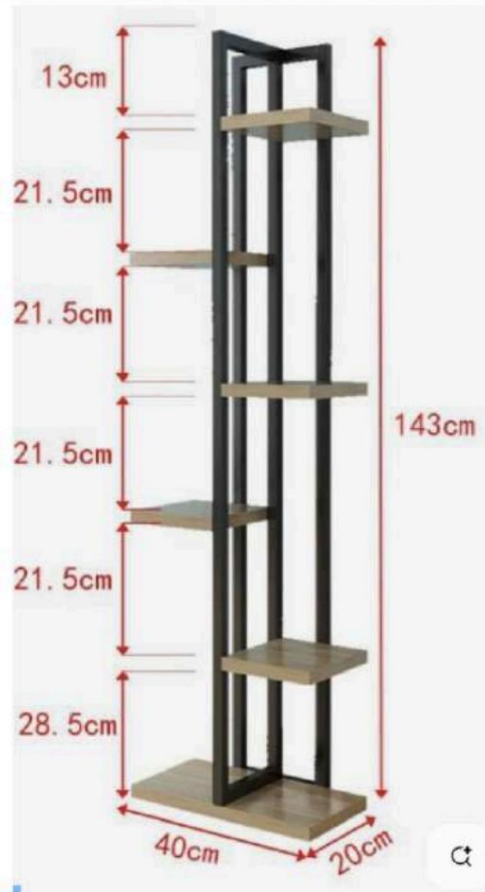

8. Assembly instructions

1. Cut and assemble the 45 x 30 cm rectangular bottom frame.
 2. Weld the vertical tubes to the base and join them with horizontal profiles.
 3. Place the first shelf 25 cm from the floor.
 4. Install the second top shelf 26 cm from the previous one.
 5. Sand, paint and fix the wooden surfaces.
-

9. Additional tips

- Excellent to combine with **minimalist or Scandinavian styles**.
- It can also be used as a stand for speakers, lamps or books.
- **Rubber levelers** can be placed to protect the floor.

Proyecto 59: Estantería vertical de 6 niveles tipo torre

Project 59: 6-Tier Vertical Tower Shelving

1. Description of the furniture

Narrow, vertical column-style shelving, ideal for small spaces like bathrooms, corners, or living room nooks. It includes six functional shelves for displaying plants, books, decorations, or everyday items.

2. General measures

- **Total height:** 143 cm
- **Width (front):** 40 cm
- **Depth:** 20 cm
- **Height between shelves (5 lower):** 21.5 cm
- **Height of the top shelf:** 13 cm from the top
- **Base height to first shelf:** 28.5 cm

3. Bill of materials (metal structure)

Component	Metal profile	Approximate measurements	Amount
Vertical structure	Metalon 20x20 mm	143 cm	4 pieces
Reinforcements between shelves	Metalon 20x20 mm	40 cm (front) / 20 cm (back) multiple	
Lower base of medium	Metalon 20x20 mm	40 x 20 cm (frame)	1 frame

Additional material:

- 6 wooden shelves measuring 40 x 20 cm
- Fastening or welding screws
- Black paint or anti-corrosion finish
- Non-slip rubber or leveling feet

4. Necessary tools

- Drill
- Angle grinder
- Welder (optional if bolted)

- Sander
 - Tape measure and set square
 - Wood paint and sealer
-

5. Cutting details (structure)

Part	Extent
Total height	143 cm
Width shelves	40 cm
Shelf depth	20 cm
Distances between levels	21.5 cm / 13 cm
Total shelves	6 units

6. Difficulty level

Low – Ideal as a practical project to start in multi-level structures.

7. Estimated manufacturing time

3 to 5 hours (structure, painting and assembly)

8. Assembly instructions

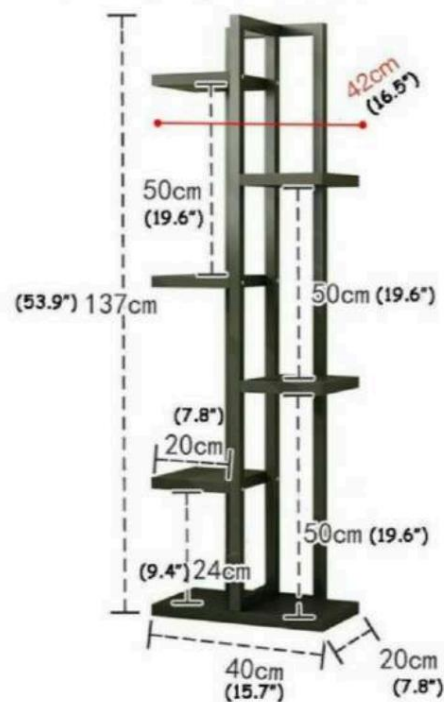

1. Build the rectangular bottom frame measuring 40 x 20 cm.
2. Weld or bolt the vertical tubes at each corner.
3. Fix shelves from bottom to top with precision at the heights established.
4. Place the top shelf 13 cm from the top to finish.

5. Paint the structure and varnish the shelves.

9. Additional tips

- Ideal for use as a **vertical plant shelf**, bookcase, or bathroom tower.
- It can be fixed to the wall if greater stability is sought.
- It combines well with **minimalist, modern or Nordic styles**.

Proyecto 60: Estantería alta con repisas alternadas en diseño abierto

Project 60: Tall shelving unit with alternating shelves in an open design

1. Description of the furniture

Modern vertical shelving with alternating shelves at different levels, ideal for dividing rooms, displaying plants, or decorative items. Its open structure allows visibility from both sides.

2. General measures

- **Total height:** 137 cm
- **Front width:** 40 cm
- **Depth:** 20 cm
- **Shelf length (protrusions):** 42 cm
- **Height between levels:** 50 cm (three sections)
- **Height from base to first shelf:** 24 cm
- **Height of intermediate side shelf:** 20 cm

3. Bill of materials (metal structure)

Component	Metal profile	Approximate measurements	Amount
Vertical tubes sides	Metalon 20x20 mm	137 cm	4 pieces
Lower crossbars	Metalon 20x20 mm	40 cm (front), 20 cm (background)	several
Projecting shelves	MDF or pine wood	42 x 20 cm	5 pieces

Extras:

- Black paint for structure
- Protective varnish for shelves
- Invisible brackets or hidden screws

4. Necessary tools

- Angle grinder
- Drill + bits for metal and wood
- Electric sander or manual sandpaper

- Set square, level and tape measure
- Paint, brush or spray

5. Cutting details

Part	Dimension
Structure height	137 cm
Lower base	40 x 20 cm
Projecting shelves	42 x 20 cm
Distance between shelves	50 cm (except 1 side at 20 cm)

6. Difficulty level

Medium – requires precision to ensure shelves are aligned and well balanced.

7. Estimated manufacturing time

4 to 6 hours (cutting, assembly, and finishing)

8. Assembly instructions

1. Assemble the lower rectangular frame measuring 40 x 20 cm.
 2. Position and secure the 137cm vertical tubes.
 3. Assemble the shelves one by one starting from the bottom, respecting the 50 cm of separation.
 4. Secure the low side shelf to a height of 20 cm.
 5. Sand and paint the entire structure, and varnish the shelves.
-

9. Additional tips

- Useful as a space divider or decorative shelving.
- You can add LED lighting to shelves to highlight objects.
- Add leveling legs if the floor is uneven.

Proyecto 61: Armario abierto con estantes laterales y perchero

Project 61: Open closet with side shelves and hanging space

1. Description of the furniture

A lightweight metal frame and fabric-covered wardrobe, ideal for small spaces or as a temporary/modular storage solution. It includes five side shelves and plenty of hanging space.

2. General measures

- **Total height:** 175 cm
- **Total width (front):** 107 cm
- **Depth:** 45 cm
- **Hanging module height:** 136 cm
- **Height of each side shelf:** 35 cm
- **Width of the hanging module:** 72 cm

3. Suggested materials list (for blacksmithing version)

Component	Suggested profile	Measures approximate	Quantity d
Vertical structure	Metalon 20x20 mm	175 cm	4 pieces
Horizontal tubes (width)	Metalon 20x20 mm	107 cm and 72 cm	several
Side tubes (depth)	Metalon 20x20 mm	45 cm	several
Shelves	MDF, plywood or melamine	45 x 35 cm approx.	5 pieces
Hanging bar (optional)	Solid round or gap	72 cm	1 piece

Optional cover (for light version):

- Heavy duty fabric or canvas for shelves
 - Closures or velcro if you want to use a cover
-

4. Necessary tools

- Drill + bits
- Angle grinder
- Hand sander or sandpaper

- Paint (spray or brush)
 - Level, set square and tape measure
-

5. Cutting details

Part	Dimensions approximate
Vertical height	175 cm
Total front width	107 cm
Coat rack width	72 cm
Background	45 cm
Height between shelves	35 cm (5 levels)

6. Difficulty level

Low – Excellent as an initial project for functional furniture.

7. Estimated manufacturing time

4 to 6 hours including cutting, assembly, and painting

8. Assembly instructions

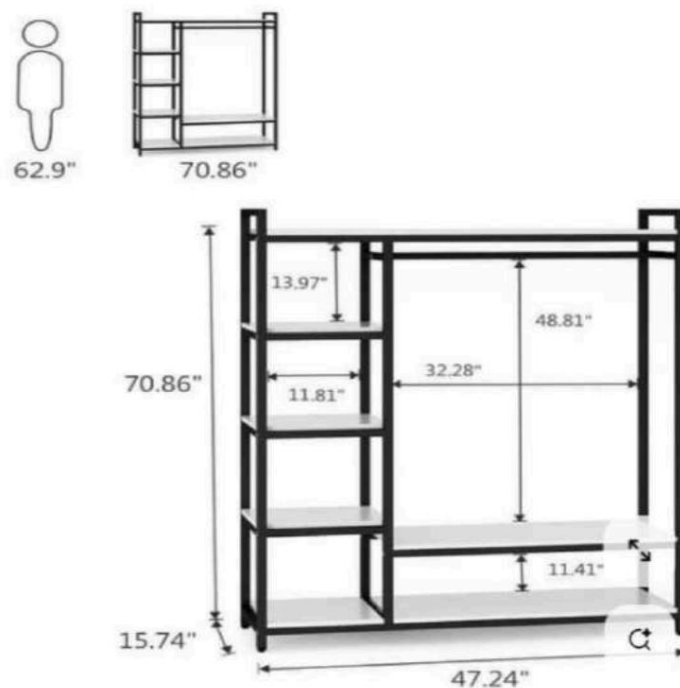

1. Cut the profiles for the base structure to 107 x 45 cm.
2. Fix the vertical tubes (4 corners) of 175 cm.
3. Add horizontal crosspieces to reinforce shelf levels.
4. Install the wood or fabric boards for the side shelves.
5. Mount the clothes rail at a height of 136 cm.

6. Paint and install leveling legs if necessary.

9. Additional tips

- You can add a **front curtain or roll-up panel** if you want to hide your clothes.
- Ideal for **small rooms, temporary closets, or guest rooms**.
- For a lighter version, use **PVC, aluminum or a removable structure**.

Proyecto 62: Armario con estantería lateral y espacio para colgar ropa

Project **62: Wardrobe with side shelving and hanging space**
clothes

1. Description of the furniture

Clothes organizer with side shelves and a hanging bar. Ideal for bedrooms, open closets, or multipurpose rooms. Perfect combination of vertical storage and a clothes rack.

2. General measures

- **Overall height:** 70.86" (180 cm)
- **Overall width (front):** 70.86" (180 cm)
- **Depth:** 15.74" (40 cm)
- **Coat rack module width:** 32.28" (82 cm)
- **Height of the clothes rack module:** 48.81" (124 cm)
- **Height between side shelves:**
 - Top shelf: 13.97" (35.5 cm)
 - Intermediate shelves: 11.81" (30 cm)
 - Bottom shelf: 11.41" (29 cm)

3. List of suggested materials

Component	Suggested material	Measures approximate	Amount
Metalon vertical structure 20x20 mm		180 cm	4 pieces
Tubes horizontal	Metalon 20x20 mm	82 cm / 120 cm	several
Hanging bars Round solid / tube 82 cm			1 piece
Shelves	MDF, plywood or melamine 30 x 40 cm approx.		4 pieces
Long base shelf in MDF, plywood or melamine, approx. 82 x 40 cm.			1 piece

4. Necessary tools

- Angle grinder
- Drill with bits for metal and wood
- Electric sander or manual sandpaper

- Spray paint or synthetic enamel
- Set square, level and tape measure

5. Cutting details

Part	Dimension
Vertical height	180 cm
Background	40 cm
Wide coat rack	82 cm
Height between shelves	29–35 cm approx.

6. Difficulty level

Medium – requires precision in angles and squares for good assembly.

7. Estimated manufacturing time

5 to 7 hours including cutting, assembly, painting, and adjustments.

8. Assembly instructions

1. Build the rectangular base of 180 x 40 cm with metal tubes.
2. Fix the 180cm vertical tubes at each corner.
3. Add horizontal crossbars at different heights to support the side shelves.
4. Position and secure the clothes rail 124 cm from the floor.
5. Assemble all shelves and make sure they are aligned.
6. Sand, paint, and apply sealer to the wooden shelves.

9. Additional tips

- You can adapt the side space for organizing boxes if you prefer not to use fixed shelves.
- Ideal to combine with a mirror at one end or lower drawers.
- Add wheels if you want mobility.
