

(Part 3 - 15 pieces of furniture)

Proyecto 31: Estantería decorativa doble con estructura asimétrica

Project 31: Double decorative shelving with asymmetrical structure

1. Description of the furniture

Decorative shelving with a metal structure divided into two interconnected modules.

Asymmetrical design creates a floating and visually dynamic effect, ideal for modern spaces, offices, hallways or as a decorative centerpiece.

2. General measures

- **Total height:** 40 cm
- **Total width:** 40 cm
- **Lower module:** 40 x 30 x 30 cm
- **Upper right module:** 30 x 30 x 30 cm

- **Vertical offset:** 16 cm
- **Internal space between modules:** 12 x 12 cm

3. Bill of materials (metal structure)

Component	Metal profile	Dimensions	Approx. quantity.
Metalon lower structure	20x20 mm	40 x 30 x 30 cm (frame)	4 pieces
Structure superior	Metalon 20x20 mm	30 x 30 x 30 cm (square)	4 pieces
Metal horizontal support	20x20 mm	16 cm (x2)	2 pieces

Additional material:

- 2 wooden shelves (one 40 x 30 cm, the other 30 x 30 cm)
- Invisible screws or fasteners
- Anti-corrosive black paint or varnish

4. Necessary tools

- MIG or inverter welder
- Angle grinder
- Drill with metal and wood bits
- Set square, tape measure and level
- Hand sander or sandpaper
- Spray paint or brush

5. Cutting details (structure)

Part	Measurement (cm)
------	------------------

Bottom box	40 x 30 x 30
Top right box	30 x 30 x 30
Vertical joints	16 cm (x2)

6. Difficulty level

Low – Very suitable for those who want to experiment with modern shapes and modular.

7. Estimated manufacturing time

3 to 4.5 hours (framing, painting, and shelf assembly)

8. Assembly instructions

1. **Cut the metal profiles** to form the two frames (one larger and one smaller smaller).
 2. **Weld the frames separately** ensuring exact angles.
 3. **Join both modules** using the 16 cm supports at the side ends.
 4. **Sand all joints and paint** with a matte or satin black finish.
 5. **Mount the wooden shelves** screwed from below or with structural adhesive.
-

9. Additional tips

- Ideal to combine with **small decorative objects, candles or plants in flowerpot.**
- Can be mounted as **a free-standing shelf or hung on the wall** with fixings hidden.
- For an authentic industrial look, use **reclaimed wood or unpainted metal with clear coat.**

Proyecto 32: Mesa tipo C de 40x40 cm con altura de 70 cm

Project 32 : C-shaped table measuring 40x40 cm and 70 cm high

1. Description of the furniture

C-shaped side table with a metal base and wooden top. Its design allows it to slide under armchairs, beds, or chairs, making it easy to use as a stand for laptops, coffee, books, or other decorative items. Perfect for small spaces with practical needs.

2. General measures

- **Total height:** 70 cm
 - **Board surface:** 40 x 40 cm
 - **Bottom base:** 40 x 40 cm
-

3. Bill of materials (metal structure)

Component	Metal profile	Dimensions	Approx. quantity.
Vertical legs	Metalon 25x25 mm	70 cm	2 pieces
Lower base	Metalon 25x25 mm	40 x 40 cm (square)	4 pieces
Upper frame (optional)	Metalon 25x25 mm	40 x 40 cm	2 pieces

Additional material:

- 1 wooden board 40 x 40 cm (thickness: 2–3.5 cm)
- Invisible screws or fasteners
- Anti-corrosive black paint or protective varnish

4. Necessary tools

- MIG or inverter welder
- Angle grinder
- Drill with bits for metal and wood
- Hand sander or sandpaper
- Set square, tape measure and level
- Spray paint or brush

5. Cutting details (structure)

Part	Measurement (cm)
Laterals vertical	70 (x2)
Lower base	40 x 40
Top support	40 x 40

6. Difficulty level

Low – Quick, functional project with great utility in small spaces.

7. Estimated manufacturing time

2.5 to 3.5 hours (frame, paint, and board assembly)

8. Assembly instructions

1. **Cut the metal profiles** to form the bottom base and legs.
 2. **Weld the lower base frame** (40 x 40 cm).
 3. **Fix the 70 cm vertical legs** to the sides.
 4. **Weld or screw the top frame**, or simply place the board.
 5. **Sand, clean and paint the metal structure.**
 6. **Mount the wooden board** with screws from below or with structural adhesive.
-

9. Additional tips

- You can install **plastic ferrules or discreet wheels** on the base for greater stability.
versatility.
- The board can be made of **solid wood, melamine, MDF or even glass tempered.**
- Very useful as **a portable work table, snack stand or side table decorative.**

Proyecto 33: Silla industrial con estructura metálica y respaldo de madera

Project 33: Industrial chair with metal frame and wooden backrest

1. Description of the furniture

Industrial design chair with a steel frame and wooden top. Ideal for kitchens, dining rooms, studios, or cafes. It combines functionality with a strong, understated aesthetic. Its backrest provides additional comfort for extended use.

2. General measures

- **Total height:** 95.5 cm
 - **Seat height:** 47 cm
 - **Backrest height:** 20 cm
 - **Seat width:** 41 cm
 - **Seat depth:** 50 cm
-

3. Bill of materials (metal structure)

Component	Metal profile	Measurements (approximate)	Quantity
Vertical legs	Metalon 20x20 mm	47 cm and 95.5 cm (rear)	4
Sides of the seat	Metalon 20x20 mm	41 cm and 50 cm	4
Metal backrest supports	20x20 mm	20 cm	2

Additional material:

- Seat board: 41 x 50 cm
- Backrest piece: 41 x 20 cm
- Wood and metal screws
- Black anti-corrosion paint

4. Necessary tools

- MIG or inverter welder
- Angle grinder
- Drill with bits for metal and wood
- Sander
- Set square, level and tape measure
- Spray paint or brush

5. Cutting details (structure)

Part	Measurements (cm)
Front legs	47

Hind legs 95.5

Seat support 41 x 50

Backrest 41 x 20
support

6. Difficulty level

Medium – Requires precise structural welding and ergonomic measures.

7. Estimated manufacturing time

4 to 6 hours (frame, painting, backrest and seat assembly)

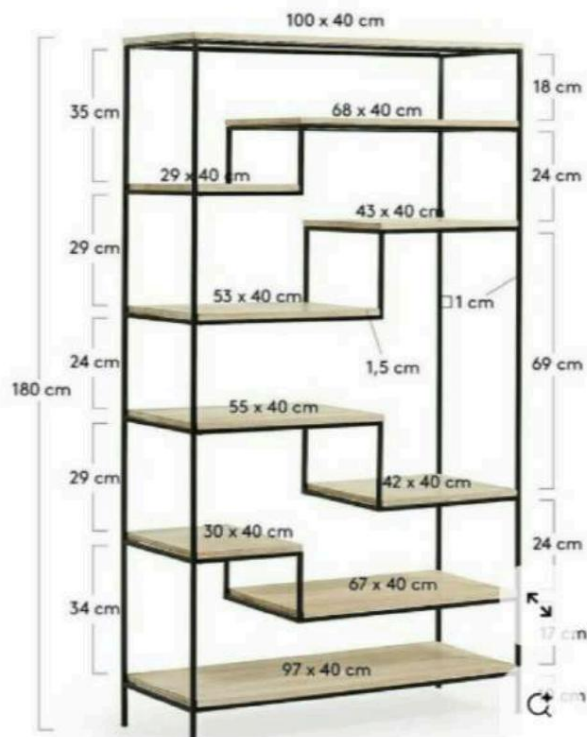

8. Assembly instructions

1. **Cut the metal profiles** according to the measurements of the base, legs and backrest.
 2. **Assemble the lower frame of the seat** (41 x 50 cm) and weld the vertical legs.
 3. **Attach the rear legs to the backrest frame.**
 4. **Sand, clean and paint the entire structure.**
 5. **Assemble the wooden seat** by securing it from below with screws.
 6. **Attach the backrest** to the rear upper structure.
-

9. Additional tips

- You can use **padded seat and backrest** for greater comfort.
- The wood can be varnished in a natural tone or blackened for contrast.
- Add **rubber feet or protectors** to the legs to protect the floor.

Proyecto 34: Librero industrial tipo zigzag con múltiples niveles

Project 34: Multi-tiered zigzag industrial bookcase

1. Description of the furniture

Large-capacity vertical bookcase with a metal frame and wooden shelves arranged in a staggered zigzag pattern. Ideal for books, decorations, plants, or even as a space divider in living rooms or offices.

2. General measures

- **Total height:** 180 cm
- **Total width:** 100 cm
- **Depth:** 40 cm
- **Height between levels:** approx. 24–35 cm.
- **Individual shelves:**

- 97 x 40 cm
- 67 x 40 cm
- 30 x 40 cm
- 55 x 40 cm
- 53 x 40 cm
- 29 x 40 cm
- 68 x 40 cm
- 43 x 40 cm
- 42 x 40 cm

3. Bill of materials (metal structure)

Component	Metal profile	Dimensions	Estimated amount
Side frames	Metalon 25x25 mm	180 cm tall (x2)	2 pieces
Horizontal profiles	Metalon 25x25 mm	According to shelves (100 cm approx.)	10+ pieces
Shelf brackets	Metalon 25x25 mm	Cuts according to levels	10+ pieces

Additional material:

- 9 wooden shelves with exact measurements (see previous section)
- Wood screws and invisible fixings
- Anti-corrosive black paint or clear varnish

4. Necessary tools

- MIG or inverter welder
- Angle grinder
- Drill with bits for metal and wood
- Hand sander or sandpaper
- Set square, tape measure and level
- Paint (spray or brush)

5. Cutting details (wood)

Shelf	Measurement (cm)
Lower base	97 x 40
Lower zigzag	67 x 40
Medium zigzag	30 x 40
Intermediate level	55 x 40
Medium-high level	53 x 40
Upper level	29 x 40
Upper zigzag	68 x 40
Upper right level	43 x 40
Right zigzag level	42 x 40

6. Difficulty level

High – Requires detailed planning, precision alignment, and a firm structure to resist the weight.

7. Estimated manufacturing time

10 to 14 hours (structure, painting, assembly and leveling of all shelves)

8. Assembly instructions

1. **Cut and prepare the** vertical and horizontal side metal structure.
2. **Weld the outer structure** (general frame of 180 x 100 cm).
3. **Install interior supports** for each level following the zigzag pattern.
4. **Sand all welds**, degrease and paint the entire structure.
5. **Assemble the wooden shelves** ensuring level and precise alignment.
6. **Check stability** and secure to the wall if greater security is desired.

9. Additional tips

- Add **levelers to the base** to accommodate uneven floors.
- You can use **melamine, laminated MDF or recycled wood** depending on the style desired.
- Ideal for **decorating a room or dividing spaces in open spaces**.

Proyecto 35: Escritorio en L con múltiples niveles y estantes laterales

Project 35: L-Shaped Desk with Multiple Tiers and Side Shelves

1. Description of the furniture

Multifunctional L-shaped desk with a sturdy metal frame and wooden worktops. It features side shelves and open spaces for better organization. It offers ample space for working with a PC, laptop, books, or decorative items.

2. General measurements (converted from inches to centimeters)

- **Total length main side:** 62.99 in ÷ 160 cm
 - **Short side in L:** 23.62 in ÷ 60 cm
 - **Total depth:** 39.45 in ÷ 100 cm
 - **Total height:** 35.43 in ÷ 90 cm
 - **Top shelf height:** 12.63 in ÷ 32 cm
 - **Legroom:** 23.23 in ÷ 59 cm
 - **Main internal shelf:** 39.37 in ÷ 100 cm
 - **Width of each side shelf module:** 11.73 in ÷ 30 cm
-

3. Bill of materials (metal structure)

Component	Metal profile	Dimensions (cm)	Estimated amount
Vertical columns	Metalon 25x25 mm	90 cm	6 pieces
Metalon side rails	25x25 mm	100 cm, 60 cm	6 pieces
Shelf brackets	Metalon 25x25 mm	According to position	6 pieces approx.

Additional material:

- Wooden boards:

- Main cover: 160 x 60 cm
- Side segment: 60 x 60 cm
- Bottom shelf: 100 x 30 cm
- Side shelves (x3): 30 x 60 cm approx.
- Screws and fasteners
- Black anti-corrosion paint

4. Necessary tools

- MIG or inverter welder
- Angle grinder
- Drill with bits for metal and wood
- Sander or sandpaper
- Tape measure, set square and level
- Paint (spray or brush)

5. Cutting details (wood)

Part	Approximate measurement (cm)
Main board	160 x 60
Lateral L segment	60 x 60
Top shelf L	60 x 15
Long bottom shelf	100 x 30
Side shelves (x3)	60 x 30

6. Difficulty level

High – Requires precise measurements and cuts to align levels properly and ensure stability.

7. Estimated manufacturing time

10 to 14 hours (structure, painting, complete assembly)

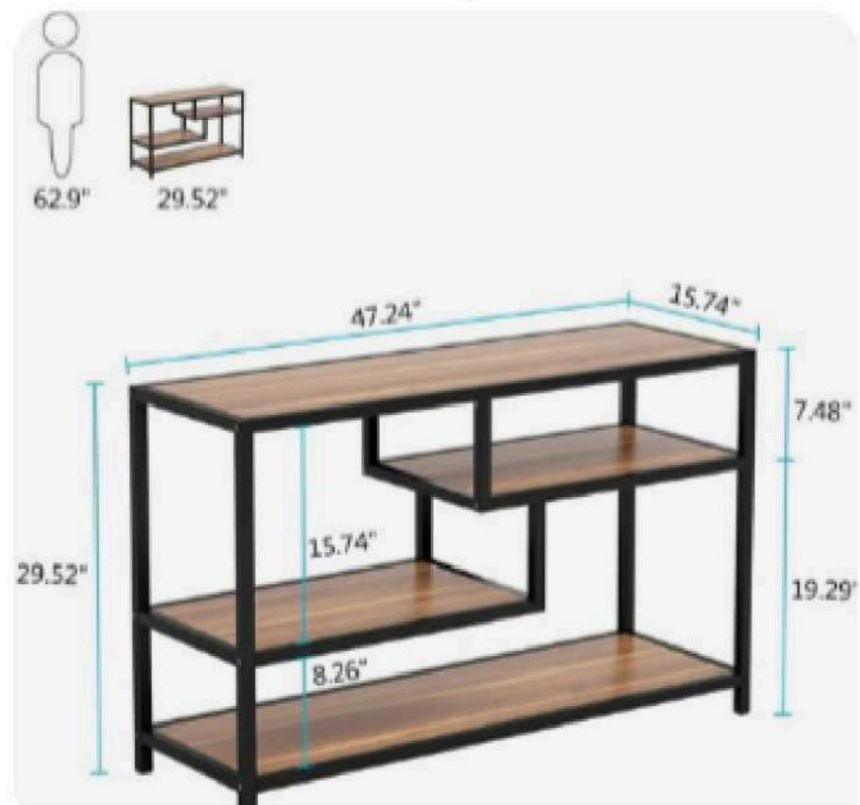

8. Assembly instructions

1. **Assemble the base frame of the desk**, starting with the largest rectangle.
 2. **Weld the vertical legs** and join them with horizontal crossbars.
 3. **Add top shelf support** and lower shelves.
 4. **Sand, degrease and paint the entire structure.**
 5. **Assemble the wooden boards**, ensuring level and firmness.
 6. **Place rubber stops or levelers** on the base if necessary.
-

9. Additional tips

- You can use **metal racks** on the lower shelves for greater ventilation if electronic equipment is stored.
- Ideal to combine with **an ergonomic or office chair**.
- Add **LED lights, cable organizers, and corner protectors** to improve functionality and safety.

Proyecto 36: Mueble auxiliar bajo con estantería escalonada

Project 36: Low auxiliary furniture with stepped shelves

1. Description of the furniture

Modern, low-profile piece of furniture with a metal frame and tiered wooden tops. Perfect for use as an entryway console table, decorative shelving, small TV stand, or a stand for plants, books, and ornaments.

2. General measurements (converted from inches to centimeters)

- **Total height:** 29.52 in ÷ 75 cm
- **Total width:** 47.24 in ÷ 120 cm
- **Depth:** 15.74 in ÷ 40 cm
- **Middle shelf height:** 15.74 in ÷ 40 cm

- **Upper compartment height:** 7.48 in ÷ 19 cm
- **Bottom compartment height:** 8.26 in ÷ 21 cm

3. Bill of materials (metal structure)

Component	Metal profile Measurements (approximate)	Quantity
Vertical legs	Metalon 25x25 mm 75 cm (x4)	4 pieces
Horizontal stringers	Metal 25x25 mm 120 cm, 40 cm, 19 cm	10+ parts
Internal reinforcements	Metalon 25x25 mm according to levels staggered	6 pieces

Additional material:

- Wooden boards:
 - 3 shelves of 120 x 40 cm
- Invisible screws and fixings
- Black anti-corrosion paint

4. Necessary tools

- MIG or inverter welder
 - Angle grinder
 - Drill with bits for metal and wood
 - Sander or sandpaper
 - Tape measure, set square and level
 - Spray paint or brush
-

5. Cutting details (structure)

Part	Measurements (cm)
Total height	75
Long shelves	120
Shelf depth	40
Height between levels	40, 21, 19

6. Difficulty level

Medium – Requires precision alignment for staggered distribution and firm welding.

7. Estimated manufacturing time

5 to 7 hours (frame, painting, and shelf assembly)

8. Assembly instructions

1. **Cut the metal profiles** according to the plans for the base structure and supports inmates.
 2. **Weld the lower and upper frames**, respecting the staggered divisions.
 3. **Sand the joints and paint the metal structure.**
 4. **Fix the wooden boards** to the levels with screws or invisible fixings.
 5. **Check leveling and stability.**
-

9. Additional tips

- You can use it as a **sideboard, low console or decorative bench without cushions.**

- For a more industrial look, leave the metal with a matte black finish and the wood in natural tone.
- Ideal for including **baskets or organizing boxes** on the lower levels.

Proyecto 37: Zapatero de 5 niveles con estructura tubular

Project 37: 5-Tier Shoe Rack with Tubular Frame

1. Description of the furniture

Vertical shoe organizer with a tubular frame and horizontal shelves. Ideal for homes with limited space, this shoe rack can store up to 15 pairs of shoes in a compact and aesthetically pleasing space.

2. General measures

- **Total height:** 89 cm
- **Total width:** 59 cm

- **Depth:** 28 cm
- **Height between shelves:** 17 cm (x4 intermediate spaces)
- **Number of levels:** 5 (including base and cover)

3. Bill of materials (tubular structure)

Component	Suggested material	Measures (approximate)	Quantity d
Vertical tubes	Tubular steel Ø20 mm or PVC reinforced	89 cm	4 pieces
Tubes horizontal	Tubular steel or PVC Ø20 mm	59 cm (width)	10 parts
Supports of shelves	T-joints or elbows (plastic/metal)	-	8 pieces
Surfaces of shelf	MDF, melamine, durable fabric or wire mesh	59 x 28 cm	5 pieces

4. Necessary tools

- Pipe cutting saw (manual or electric)
 - Drill (if using metal) or plastic joiner
 - Sander or sandpaper for finishes
 - Screws and screwdriver (only if fixing the shelf)
 - Tape measure and level
-

5. Cutting details (pipes and shelves)

Part	Measurements (cm)
Vertical sides	89 (x4)
Horizontal tubes	59 (x10)

Horizontal
surfaces

59 x 28 (x5)

6. Difficulty level

Low – Ideal project for beginners or quick assembly without soldering.

7. Estimated manufacturing time

1.5 to 2.5 hours (structure, cutting, and assembly)

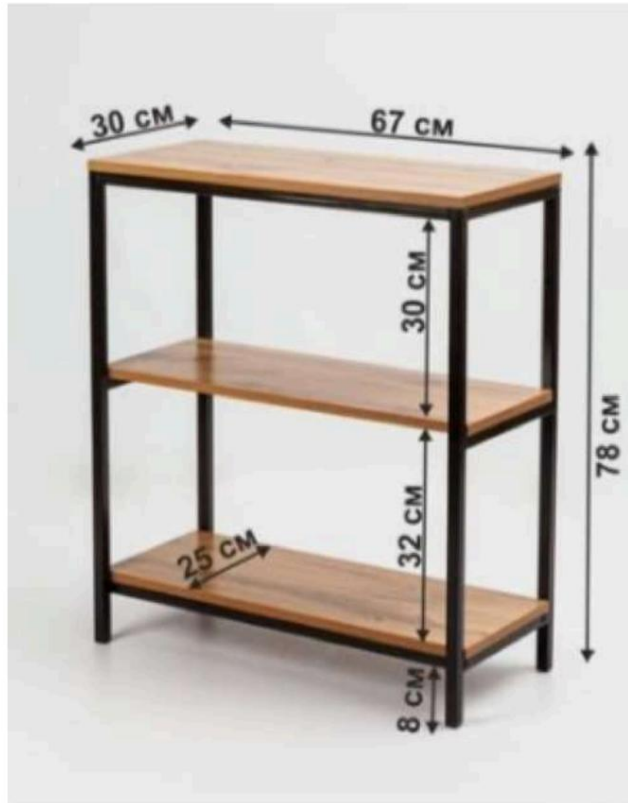

8. Assembly instructions

1. **Cut all tubes** to the corresponding length (vertical and horizontal).
 2. **Assemble the side frame** with “T” type joints or elbows.
 3. **Assemble the shelves** at each level, starting from the base.
 4. **Tighten the connections** and level the structure.
 5. **Place the shelves (fabric, wood or wire mesh)** on each level.
-

9. Additional tips

- You can use **modular or 3D printed connectors** for ease of assembly.
mounting.
- Add **non-slip stops or small wheels** if you want it to be mobile.
- Ideal for placing in **hallways, closets, corridors, or laundry areas**.

Proyecto 38: Estantería de 3 niveles con estructura metálica

Project 38 : 3-Tier Shelving Unit with Metal Frame

1. Description of the furniture

Compact and functional three-tier shelving unit with a black metal frame and wooden shelves. Ideal as an organizer for books, plants, ornaments, or to complement any small space such as kitchens, offices, or hallways.

2. General measures

- **Total height:** 78 cm
- **Width:** 67 cm
- **Depth:** 30 cm
- **Height between levels:**

- Lower to medium: 32 cm
 - Medium to upper: 30 cm
 - Ground clearance: 8 cm
 - **Bottom shelf depth:** 25 cm
-

3. Bill of materials (metal structure)

Component	Metal profile Measurements (approximate)	Quantity
Vertical legs	Metalon 20x20 mm 78 cm (x4)	4 pieces
Sleepers horizontal	Metalon 20x20 mm 67 cm (front and back)	6 pieces
Deep sides	Metalon 20x20 mm 30 cm (sides)	6 pieces

Additional material:

- 3 wooden shelves (67 x 30 cm approx.)
 - Wood screws or invisible fixings
 - Anti-corrosive black paint or varnish
-

4. Necessary tools

- MIG or inverter welder
 - Angle grinder
 - Drill with bits for metal and wood
 - Hand sander or sandpaper
 - Set square, level and tape measure
 - Paint (spray or brush)
-

5. Cutting details (structure)

Part	Measurements (cm)
Vertical legs	78 (x4)
Front sleepers	67 (x6)
Side depth	30 (x6)

6. Difficulty level

Low – Very good option for beginners looking for functionality and aesthetics.

7. Estimated manufacturing time

3 to 4.5 hours (structure, painting, and assembly)

8. Assembly instructions

1. **Cut the metal profiles** and assemble the bottom frame.
 2. **Weld the vertical legs** and add the supports for the middle and lower levels.
superior.
 3. **Sand and paint the metal structure.**
 4. **Install the wooden shelves** by securing them from below or with hidden brackets.
 5. **Check leveling and stability.**
-

9. Additional tips

- You can use melamine, laminated MDF, or recycled wood for the shelves.
- Add **plastic tips** to the base to protect the floor.
- Use it as an entryway piece of furniture, a bathroom organizer, or a rustic mini bar.

Proyecto 39: Librero industrial grande con compartimentos asimétricos

Project 39: Large industrial bookcase with compartments asymmetrical

1. Description of the furniture

This large vertical shelf combines modern design with functionality. Its metal frame and wooden shelves allow you to organize books, decorations, plants, or accessories, with asymmetrical compartments that break up the visual monotony and add dynamism to the space.

2. General measures

- **Total height:** 188 cm
- **Total width:** 120 cm
- **Depth:** 38 cm
- **Height between large sections:** 58 cm
- **Height of small compartments:** 28 cm

3. Bill of materials (metal structure)

Component	Metal profile	Estimated amount	
		Measurements (approximate)	
Metalon vertical columns	25x25 mm	188 cm	4 pieces
Sleepers horizontal	Metalon 25x25 mm	120 cm, 38 cm and 28 cm +20 pieces	
Interior supports	Metalon 25x25 mm	According to compartments 12 pieces	

Additional material:

- 5 large shelves (120 x 38 cm)
- 3 small shelves (approximately 28 x 38 cm)
- Screws, invisible fixings or structural adhesive
- Matte black anti-corrosive paint

4. Necessary tools

- MIG or inverter welder
- Angle grinder
- Drill with bits for metal and wood
- Sander or sandpaper
- Set square, tape measure and level
- Paint (spray or brush)

5. Cutting details (structure)

Part	Measurement (cm)
------	------------------

Column height 188

Main width 120

Depth 38

Interior height 58 and 28

6. Difficulty level

High – Requires precision, controlled visual symmetry and good structural design.

7. Estimated manufacturing time

10 a.m. to 2 p.m. (structure, painting, assembly)

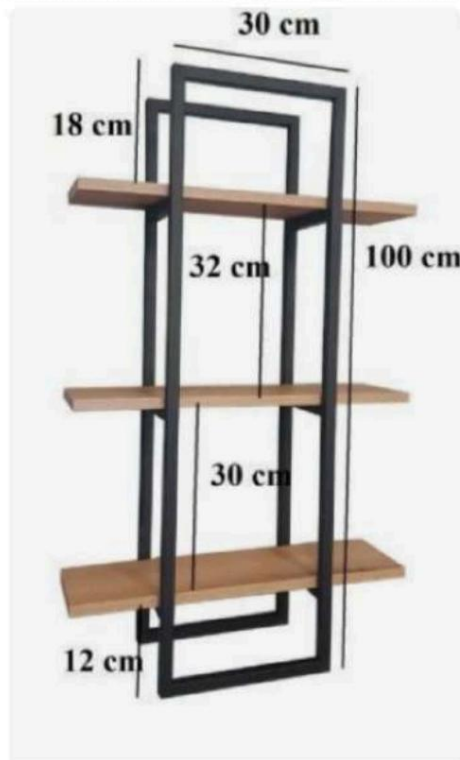

8. Assembly instructions

1. **Cut all metal profiles** according to the general design and compartments inmates.
 2. **Assemble the complete exterior frame:** base, roof and side columns.
 3. **Add the interior divisions** respecting the spaces of 58 cm and 28 cm.
 4. **Sand, clean and paint the structure.**
 5. **Assemble the wooden shelves** at the indicated levels.
 6. **Check that everything is square and firm.**
-

9. Additional tips

- You can add **glass or wooden doors** to the lower compartments to more privacy.
- Ideal for use as **a decorative bookcase or dividing furniture** in open spaces.
- Combinable with integrated LED lighting to highlight decorative objects.

Proyecto 40: Estantería decorativa con marco rectangular doble

Project 40: Decorative shelving with a double rectangular frame

1. Description of the furniture

Compact three-tier vertical shelving unit with a modern design featuring a double rectangular metal frame that encloses the wooden shelves. Ideal for small spaces or as a decorative piece in living rooms, studios, or entryways.

2. General measures

- **Total height:** 100 cm
- **Total width:** 30 cm
- **Depth:** 30 cm
- **Height between shelves:**
 - Below average: 30 cm

- Middle to upper: 32 cm
- Above the frame: 18 cm
- Below the frame: 12 cm

3. Bill of materials (metal structure)

Component	Metal profile	Measures (approximate)	Amount
Double vertical frames	Metalon 20x20 mm	100 cm (x2)	2 pieces
Metalon 20x20 upper stringers	mm	30 cm	2 pieces
Horizontal supports	Metalon 20x20 mm	30 cm (x6)	6 pieces
Lower structure	Metalon 20x20 mm	12 cm (x1)	1 piece (decorative bridge)

Additional material:

- 3 wooden shelves: 30 cm x 30 cm
- Invisible screws or fixings
- Anti-corrosive black paint or varnish

4. Necessary tools

- MIG or inverter welder
- Angle grinder
- Drill with bits for metal and wood
- Sander or sandpaper
- Tape measure, set square and level

- Paint (spray or brush)
-

5. Cutting details (structure)

Part	Measurements (cm)
Full frame height	100
Wide structure	30
Internal separations	32, 30, 18, 12

6. Difficulty level

Low – Ideal for those looking for a striking design with a simple construction process.

7. Estimated manufacturing time

3.5 to 5 hours (frame, painting, shelf assembly)

8. Assembly instructions

1. **Cut the metal profiles** for the side frames and upper rails.
 2. **Assemble the external rectangular frame**, joining it with the upper and lower stringers. inferior.
 3. **Add horizontal internal reinforcements** for each shelf level.
 4. **Sand, degrease and paint the entire structure.**
 5. **Place the wooden shelves**, securing them from below with hidden screws.
-

9. Additional tips

- Perfect for hanging **on a wall or using floating supports.**

- You can varnish the shelves with **walnut, oak or wenge stain** for contrast industrial.
- It fits well as **a decorative bathroom or kitchen shelf or compact bookcase**.

Proyecto 41: Mueble organizador tipo clóset abierto con zapatero y repisas

Project 41: Open closet organizer with shoe rack and shelves

1. Description of the furniture

Multifunctional industrial-style furniture, ideal for entrances, bedrooms or dressing rooms. It combines hanging space, shelves for accessories, and a closed shoe rack at the bottom. It offers optimized vertical organization with a modern and elegant design.

2. General measures

- **Total height:** 167 cm
- **Total width:** 90 cm
- **Depth:** 40 cm

- **Height of clothes hanging compartment:** 125 cm

- **Side shelves:**

- Heights between levels: 39.5 cm (x2), 42 cm (top)
- Side depth: 30 cm

- **Lower shoe rack:**

- Height: 32 cm
- Width per door: 42.5 cm
- Total shoe rack width: 85 cm
- Depth: 40 cm

3. Bill of materials (metal structure)

Component	Metal profile	Approximate measurements	Amount
Vertical legs	Metalon 25x25 mm	167 cm	4 pieces
Stringers horizontal	Metalon 25x25 mm	90 cm, 40 cm, 30 cm, 54 cm	10+ parts
Shoemaker's frame	Metal 25x25 mm	85 x 32 x 40 cm	4+ pieces
Clothes hanger tube	1" round	58 cm	1 piece

Additional material:

- Melamine or wood boards (top, sides and shoe rack)
- Metal mesh or perforated wood doors
- Screws, hinges, height adjusters
- Black anti-corrosion paint

4. Necessary tools

- MIG or inverter welder
- Angle grinder
- Drill with metal and wood bits
- Sander or sandpaper
- Tape measure, set square and level
- Paint (spray or brush)

5. Cutting details (structure)

Part	Measurement (cm)
Main height	167
Main width	90
Overall depth	40
Compartment height	125, 42, 39.5, 32

6. Difficulty level

High – Requires structural precision, modular design, and planning for clean assembly.

7. Estimated manufacturing time

10 to 15 hours (structure, doors, painting, assembly)

8. Assembly instructions

1. **Cut metal profiles** for the base structure, verticals and internal sections.
2. **Assemble the external frame** (height and depth).
3. **Weld the interior partitions and hanging support.**

4. **Assemble the lower module (shoe rack)** with doors and central division.
 5. **Sand, clean and paint the entire structure.**
 6. **Screw boards and mount the lower compartment doors.**
-

9. Additional tips

- You can add **wheels with brakes** for greater mobility.
- The lower doors can be made of **metal mesh, rattan or decorative wood**.
- Excellent as a **portable mini closet or entry station**.

Proyecto 42: Barra alta con taburetes cuadrados metálicos

Project 42: High bar with square metal stools

1. Description of the furniture

Breakfast bar set or bar with two high metal stools. Its design Minimalist and functional makes it perfect for kitchens, small apartments, terraces or interior bars. Compact, elegant, and easy to manufacture.

2. General measures

Bar

- **Height:** 89 cm
- **Width:** 140 cm
- **Depth:** 40 cm

Stools

- **Height:** 89 cm
 - **Seat base:** 30 x 30 cm
 - **Lower base structure:** 30 x 30 cm
-

3. Bill of materials (metal structure)

Component	Metal profile Measurements (approximate)	Quantity
Bar legs	Metalon 25x25 mm 89 cm (x4)	4 pieces
Bar stringers	Metalon 25x25 mm 140 cm and 40 cm	4 pieces
Stool structure	Metalon 20x20 mm 89 cm (x8)	8 pieces
Base reinforcements stool	Metalon 20x20 mm 30 cm (x8)	8 pieces

Additional material:

- Wooden board (bar): 140 x 40 cm
- Wooden seats: 30 x 30 cm (x2)
- Plastic screws, fasteners and levelers

- Anti-corrosive black paint or varnish
-

4. Necessary tools

- MIG or inverter welder
 - Angle grinder
 - Drill with bits for metal and wood
 - Sander or sandpaper
 - Tape measure, set square and level
 - Paint (spray or brush)
-

5. Cutting details (structure)

Part	Measurement (cm)
Bar legs	89
Side bar	140 and 40
Stool legs	89 (x8)
Stool beams	30 (x8)

6. Difficulty level

Medium – Ideal project for those who have mastered basic welding and want a piece of furniture functional and attractive.

7. Estimated manufacturing time

6 to 8 hours (structure, painting, assembly)

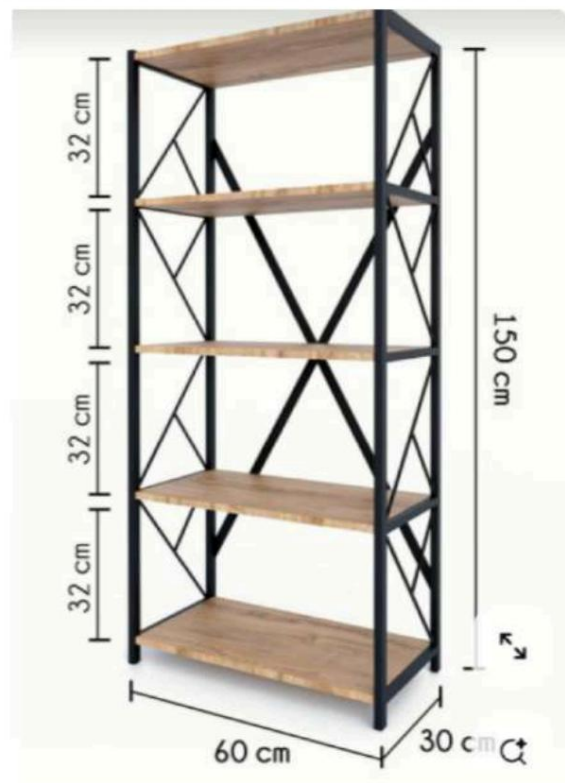

8. Assembly instructions

1. **Cut the metal profiles** according to the indicated measurements.
2. **Assemble the bar structure**, starting with the top frame and then the paws.
3. **Repeat for each stool**, creating a 30 x 30 cm bottom frame and a top frame where the seat will be screwed.
4. **Sand joints and apply anti-corrosion paint.**
5. **Secure the bar top and seats with hidden screws from below.**

9. Additional tips

- You can add **footrests to the stools** for added comfort.
- The board can be made of **recycled wood, melamine or thin marble.**
- Add **levelers to the legs** if the floor is not completely straight.

Proyecto 43: Estantería alta de 5 niveles con refuerzo en cruz

Project 43: 5-Tier Tall Shelving with Cross Bracing

1. Description of the furniture

Sturdy five-tier vertical shelving unit, made with a metal frame and wooden shelves. It features "X"-shaped cross braces on the sides and back for added stability. Perfect for bookcases, offices, kitchens, or decorative storage.

2. General measures

- **Total height:** 150 cm
 - **Width:** 60 cm
 - **Depth:** 30 cm
 - **Height between shelves:** 32 cm (uniform on all 5 levels)
 - **Number of shelves:** 5
-

3. Bill of materials (metal structure)

Component	Metal profile	Approximate measurements	Quantity
Vertical legs	Metalon 25x25 mm	150 cm	4 pieces
Sleepers horizontal	Metalon 25x25 mm	60 cm (front), 30 cm (sides)	10 parts
Cross reinforcements	Round 3/8" or platen	Diagonal cut ± 65 cm	6 pieces

Additional material:

- 5 wooden shelves: 60 x 30 cm
- Screws, invisible fixings or internal angles
- Anti-corrosive black paint or varnish

4. Necessary tools

- MIG or inverter welder
- Angle grinder
- Drill with bits for metal and wood
- Sander or sandpaper
- Tape measure, set square and level
- Paint (spray or brush)

5. Cutting details (structure)

Part	Measurement (cm)
Vertical legs	150
Sleepers horizontal	60 x 30
Height between levels	32
Diagonal reinforcements	±65

6. Difficulty level

Medium – Practical project with simple structural reinforcement that improves stability.

7. Estimated manufacturing time

5 to 7 hours (frame, painting, shelf assembly)

8. Assembly instructions

1. Cut the metal profiles for the sides and horizontals.

2. **Assemble the rectangular base frame**, with the cross members every 32 cm.
 3. **Weld the “X” type cross reinforcements** on the sides and/or rear.
 4. **Sand, paint and let the structure dry.**
 5. **Assemble the wooden shelves** by securing them from below with screws.
-

9. Additional tips

- You can attach it to the wall if you carry heavy objects for maximum security.
- Shelves can be varnished in a rustic or neutral tone for an industrial look.
- Ideal for bookcases, plants, kitchen or even as a room divider.

Proyecto 44: Estantería moderna horizontal con soportes laterales tipo marco

Project 44: Modern horizontal shelving with frame-type side supports

1. Description of the furniture

Modern vertical shelving unit with five floating shelves supported by two rectangular metal side frames. Its clean, open structure makes it ideal for decoration, organizing books, or as a dividing unit in large spaces.

2. General measures

- **Total height:** 160 cm
 - **Total width:** 120 cm
 - **Depth:** 34 cm
 - **Number of shelves:** 5
 - **Estimated vertical separation between shelves:** 32 cm (average)
-

3. Bill of materials (metal structure)

Component	Metal profile	Approximate measurements	Amount
Side frames vertical	Metalon 25x25 mm	160 x 34 cm (rectangular shape)	2 units
Lower reinforcements	Metalon 25x25 mm	34 cm	2 pieces
Internal supports	Metalon 25x25 mm	34 cm per shelf	10 pieces approx.

Additional material:

- 5 wooden shelves measuring 120 x 34 cm
 - Invisible screws or brackets
 - Anti-corrosive black paint or varnish
-

4. Necessary tools

- MIG or inverter welder

- Angle grinder
 - Drill with bits for metal and wood
 - Sander or sandpaper
 - Tape measure, set square and level
 - Paint (spray or brush)
-

5. Cutting details (structure)

Part	Measurements (cm)
Frame height	160
Depth frame	34
Shelves	120 x 34

6. Difficulty level

Medium – Symmetrical and clean project, ideal for those who want functionality with aesthetics.

7. Estimated manufacturing time

5 to 7 hours (framing, painting, shelf installation)

8. Assembly instructions

1. **Weld each side frame** with 160 cm (vertical) and 34 cm profiles (upper/lower).
2. **Cut and weld the internal supports** that will hold the shelves.
3. **Sand, clean and paint the entire metal structure.**
4. **Assemble the wooden shelves**, securing them from below or with hidden brackets.

9. Additional tips

- You can hang it on the wall or leave it on the floor as a decorative divider.
- The contrast between warm wood and black metal offers a modern industrial style.
- Also ideal as a **shelf for the kitchen, office, living room or hallway.**

Proyecto 45: Escritorio con repisas superiores y soporte inferior

Project 45: Desk with upper shelves and lower support

1. Description of the furniture

A metal and wood-framed desk with built-in shelving above and storage below. Ideal for home offices, studios, or work areas, it combines functionality and vertical organization in a single, compact piece of furniture.

2. General measurements (in inches and centimeters)

- **Total height:** 55.11" ÷ 140 cm
- **Total width:** 47.24" ÷ 120 cm
- **Total depth:** 23.62" ÷ 60 cm
- **Desk height (to surface):** 29.13" ÷ 74 cm

Upper shelf

- Side compartment height: 9.64" + 9.25" + 6.10" ÷ 24.99" ÷ 63.5 cm
- Top shelf depth: 7.87" ÷ 20 cm
- Center space width: 29.13" ÷ 74 cm

Bottom bracket

- Legroom: 14.56" ÷ 37 cm
- Bottom shelf: 4.92" high, 7.87" deep

3. Bill of materials (metal structure)

Component	Metal profile Measurements (approximate)	Quantity
Vertical legs	Metalon 25x25 mm 74 cm	4 pieces
Base structure support	Metalon 25x25 mm 120 cm and 60 cm	6 pieces
Vertical supports rack	Metalon 20x20 mm 55 cm	2 pieces

Additional material:

- Wooden or melamine boards:
 - Desk: 120 x 60 cm
 - Top shelf: 120 x 20 cm
 - 20 x 20 cm shelves and interior panels

- Screws, fixings and hinges (optional)
 - Anti-corrosive black paint or varnish
-

4. Necessary tools

- MIG or inverter welder
 - Angle grinder
 - Drill with bits for metal and wood
 - Sander or sandpaper
 - Tape measure and set square
 - Paint (spray or brush)
-

5. Cutting details (structure)

Part	Estimated measurement (cm)
Vertical legs	74
Front/side rails 120 and 60	
Total height	140
Shelf height	24.5 (divided into 3 compartments)

6. Difficulty level

Medium-High – Requires precise modular assembly and multiple fixing points for rack.

7. Estimated manufacturing time

6 to 9 hours (structure, painting, panel assembly)

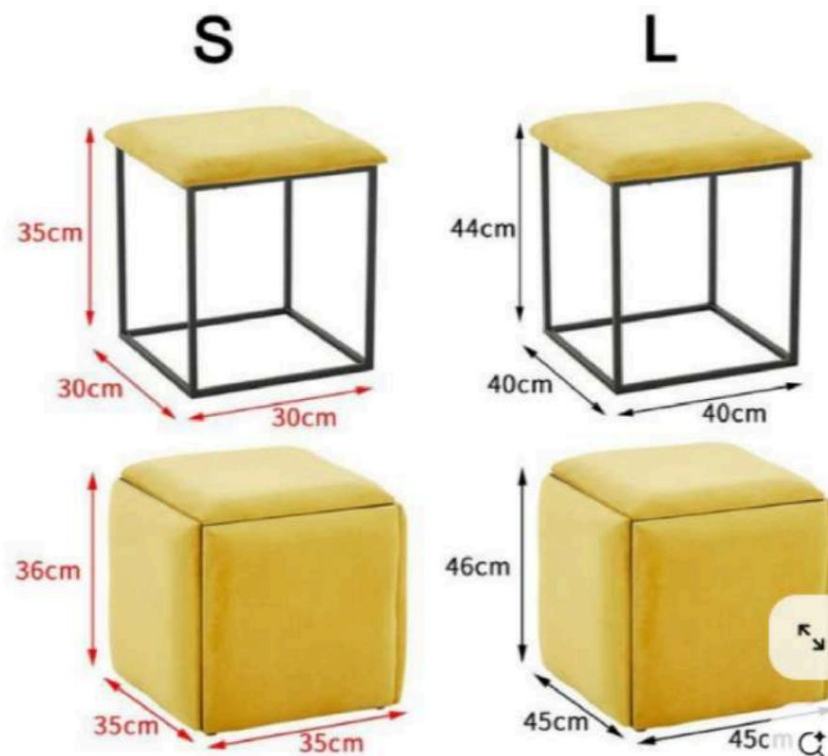

8. Assembly instructions

1. **Cut metal profiles** for the legs, bottom support and upper structure.
 2. **Assemble the metal base of the desk** with front and side crossbars.
 3. **Assemble the vertical upper structure**, respecting space for the monitor.
 4. **Fix wood panels** on desk, bookshelf and internal shelves.
 5. **Paint and finish** optional leveling or reinforcement details.
-

9. Additional tips

- Ideal for including **cable gland type handles** on the top shelf.
- You can include **adhesive LED lighting** under the upper shelves.
- Perfect for functional desks in small spaces with maximum organization.

Proyecto 46: Taburetes metálicos y tapizados en tallas S y L

Project 46: Metal and upholstered stools in sizes S and L

1. Description of the furniture

Two models of stools available in small (**S**) and large (L) sizes. Each model
It comes in two variants:

- Metal structure with padded seat
- Fully upholstered cube with rigid interior structure

Perfect for living rooms, powder rooms, bedrooms or commercial spaces.

2. General measures

Metal model

Size	Height	Width x Length
S	35 cm	30 x 30 cm
L	44 cm	40 x 40 cm

Upholstered cube model

Size	Height	Width x Length
S	36 cm	35 x 35 cm
L	46 cm	45 x 45 cm

3. List of materials

Metal version

Component	Material	Measurements (cm)
Metalon structure profile 20x20 mm depending on size		
Seat	MDF + foam + fabric	3-5 cm thickness

Upholstered version

Component	Material
-----------	----------

Internal body MDF or pine structure

Stuffed High-density foam

Upholstered Velvet or linen type fabric

Optional Hinge and hidden compartment

4. Necessary tools

- Saw or grinder for profiling (metal)
 - Pneumatic drill or nailer
 - Upholstery stapler
 - Glue gun and fabric scissors
 - Sander or sandpaper
 - Matte black paint or varnish
-

5. Cutting details (metal structure)

S (metallic):

- 4 vertical tubes of 35 cm
- 4 base tubes of 30 cm

L (metallic):

- 4 vertical tubes of 44 cm
 - 4 base tubes of 40 cm
-

6. Difficulty level

Low (simple upholstered version)
Medium (metal or compartment version)

7. Estimated manufacturing time

- Metal version: 3 to 4 hours
- Upholstered version: 2 to 3 hours

8. Assembly instructions

Metal

1. Cut and weld the rectangular structure.
2. Sand the joints and paint with anti-corrosion.
3. Upholster the padded seat separately.
4. Screw the seat from the metal base.

Upholstered

1. Assemble a square structure with MDF or wood.
2. Place foam on each face.
3. Cover with fabric and staple underneath.
4. Optional: add a hinge if it is a trunk with a removable lid.

9. Additional tips

- You can combine sizes for serial decoration.
- The upholstered version with a hollow interior is ideal for storing accessories.
- Use washable fabric or synthetic leather if it will be in high-use areas.
